Aaron C. Edmiston

Full Stack Developer

I combine the most current software engineering skills with the communication skills of a language teacher and the commercial acumen of a New York Real Estate Agent with two supporting business degrees.

London, *UK*

EDUCATION

30-Week Full Stack Software Engineering Training
January - August 2021

The Jump Digital School, *London*

BSc International Business, BSc Business Marketing
2006 - 2012

California State University Long Beach, *California*
Dean's Honor List 2011 (GPA greater than 3.5 / 4)

TECHNICAL KNOWLEDGE

Developing and deploying **full stack web applications** and **websites** using:

HTML5 and **CSS3:** Responsive design: Flexbox, CSS Grid, SASS; frameworks: Bootstrap.
JavaScript and **Node.js:** ES6+, AJAX, APIs:- REST and GraphQL, Webpack, OAuth, Express, Git, GitHub.
React: hooks, classes.
Databases and **DevOps:** SQL, NoSQL, Firebase, Heroku (inc. pipelines), serverless (inc. Netlify).
Some Exposure: TypeScript, Cypress, Jest, Docker, Kubernetes, Redux, Animation (Greensock & Three.js), Graphing (d3.js) & Realtime (websockets).

TECHNICAL ACHIEVEMENTS

Children's Literacy Hackathon
June 2021

The teams were tasked with creating a web app to make children's learning interactive and fun. They could take any technical approach they wanted and had to present their creative solution to the judges by 5 pm that same day.

Code-Pairing Supplemental Program
January - August 2021

As an initiator in my software engineering course, I saw an opportunity for all students to work together outside of class in a code pairing program. Each week, I assigned a student to a new person to work with to learn how to collaborate, see how other students write code, and help each other out if possible.

PROJECTS

Nomader.world
June - September 2021

Nomader is a concept to deployment, full stack project that utilized Skyscanner's API for currencies and discount flight details. Although Skyscanner has recently discontinued their open source API, the front end is still a good representation of what the site was when it was fully functional.

Skills used: **React, Node, Express, APIs, Axios, Send in Blue, MySQL, Heroku, Web Hosting, Javascript, CSS, HTML**
